

Please urgently reactivate our Facebook account Ambientevalsusa No Tav

Today, february 5th at 12,00 A.M. we signed into our Facebook account and everything was ok, we don't know how, but after a while, our Facebook account have been disabled after this time. Network administrators blocked our account so we can't access to it anymore. This is a very bad thing.

Our organization Ambientevalsusa No Tav is working in same environmental project involved European Parliament, Italian government, and French regional government of Rhone Alpes.

We have hundreds of friends in european, italian and french government and many links with environmental associations as WWF, Attac, Legambiente, Greenpeace etc... We also have many contact with italian and french journalists, bloggers as Piero Ricca, Vittorio Zambardino, Nino Randisi. The first italian blogger, our friend Mr Bebbe Grillo, has been contacted today in order to explain your unfair censorship cause of serious damage.

We have always utilized the account in respect of rules and conditions, and we don't work with a view to profit. After the "start day" of our account in november 2009, Ambientevalsusa No Tav has been contacted by thousands of users and obtained more than 3.600 friends. Our activity is your best advertising, but it seems you don't agree. We regret to have inform you that you have disabled us without any notice. This could cause serious damage not only tot our organization but also to the environment. For this reason we are contacting the best lawyers and same barristers that Associations and politicians have suggested to us. We hope you urgently reactivate our Facebook account, in order to stop our legal procedure.

P.S. Today the account of another organization, working on same environmental cause, have been disabled (Comitato No Tav Susa Mompantero), in consequence of this, our lawyers suppose that your censorship action is suggested from same reports that you are not able to check. This possible incompetence should be not acceptable. We have an internet site, www.ambientevalsusa.it and a mailing list with 34.000 e-mails; we reserve to send to everybody information about this letter, if our account will not immediately be reactivated.

Best regards,

Ambientevalsusa
